

Launching Your Cash-Based Longevity Practice

How AI and Automation with DocLoop Accelerate Your Success

The New Era of Longevity Medicine

Physicians starting in the longevity and functional medicine space face a common challenge - traditional EMRs slow them down, fragment workflows, and fail to integrate the tools needed to deliver personalized, prevention-based care. DocLoop was designed from the ground up to address these gaps with a unified, AI-powered platform built specifically for cash-based practices.

The AI Advantage in Practice Growth

- Real-Time Lab Interpretation – Instantly process complex longevity labs, identify trends, and surface actionable insights.
- Automated Protocol Generation – Drafts hormone, peptide, supplement, and lifestyle protocols in minutes, ready for physician approval.
- Practice-Wide Efficiency – Reduce admin time by up to 70%, freeing more hours for patient care and revenue-generating activities.

Solving the Pharmacy & Supplement Bottleneck

One of the biggest hurdles in new longevity practices is managing pharmacy and supplement fulfillment. DocLoop eliminates this barrier with built-in ordering and fulfillment integration:

- Centralized Ordering – Place e-prescriptions and supplement orders without leaving the platform.
- Preferred Partner Network – Access to vetted, high-quality vendors.
- White-Label Options – Offer supplements under your own brand to boost patient loyalty and revenue.

Why DocLoop is the Ideal Launch Partner

Unlike generic EMRs, DocLoop is designed for:

- Cash-Based & Concierge Practices – No insurance-driven limitations.
- Personalized Care Models – Fully supports genomics, advanced labs, and lifestyle-based interventions.
- Scalable Growth – Automation tools allow you to add patients without sacrificing personalization.

Take The Next Step: Transform Your Practice

If you're ready to launch or scale your cash-based longevity practice, DocLoop provides the infrastructure, AI tools, and integrated pharmacy solutions to make it possible.
